MySQL

Platforms and Frameworks

Flutter

Firebase - Firebase authentication and Cloud Firestore

Additionally, I have experience with the Software Development Life Cycle including CI/CL, unit testing, and methods such as Agile and Test-Driven Development.

Coding Projects – github.com/PattyCoding123

Daily motivational quotes mobile application

- An app built with Flutter that allows users to receive motivational quotes from an API and save them for future reference. Authentication and cloud storage are managed using Firebase.

Personal portfolio website

- A portfolio website that was created using the React JavaScript library for the frontend and Sanity for the backend content management.

Ecommerce website

- An online eCommerce website created using React and Next.js for the frontend and Sanity for the backend content management. Online payments were managed using Stripe.
